About This Game

You are an embedded journalist travelling with a small US Army special forces team as they battle "The Soldiers of Heaven" - a religious cult in Iraq that tried to start a Muslim Armageddon during the Ashura festival.

This battle with the SOH ended with over 300 deaths : men, women and children. This project is based on a true story that was covered up... and now you have a chance to try and find the truth.

Armed with a virtual camera you will film your own version of the story as it unfolds in an immersive 3D world. In this build you can watch a preview in game.

This immersive journalism experience combines live action with 3D animation. It is being built with the Unreal 4 game engine.

What makes this experience unique, useful or innovative:

Virtual reality offers film makers an opportunity to step into their story world and get a 360 degree real time perspective of the world they are trying to bring to life. This is ideal for previsualization and production planning as the film maker can leverage the presence that VR offers and look for new shots and camera angles as they walk around their virtual set. What is missing is a virtual camera that the film maker can use to shoot.

We also think that filming in VR could be a new way to create animated films.

Too short, only dialouge through the entire game. Nope this one was a disappointment :(when you have that "there's too much going on for me to concentrate" feeling, this one is a fine time waster. was definitely worth a play through.. This is the most fun fps I've played in a long time! You need at least one other to have a good time, but the more people, the more fun. If you are bored and looking to play a fun simple fps, get this and you'll have a great time. There are power weapons around the map and they have a respawn ring to let you know when they are going to respawn. You also shoot the power weapons to get them which is really cool. The sliding around is hilarious too! I can't recommend the game ecnough though for the price.. As a game it's not a good game, and as porn it's not good porn. I really wouldn't bother. Also it takes AGES to get all the achievements, so it's not much good for that either.. This is one of my favorite games. It's wacky, it's fun, and just fantastic all around. The story is fun, and this is one of the games that has an endless that doesn't seem freakishly repetitive. There's an awesome boss fight at the end of the game, and there are lots of fun things that happen.

An interesting line puzzle.. this game is pretty good because there's no false advertising since you are not in fact a banana. This game is now abandonware. Had alot of memories of this game back in the Xbox 360 era, but the dev lied and has dumped the game in a ditch. He promised multiplayer and up and left and took all the money with him. What a C*nt. \u2665\u2665\u2665\u2665\u2665\u2665\u2665 furshit for gay babies boring and not fun. You can shave the whole thing of and they will still pay you full price
